

Our focus and your goal:
HUMANITARIAN IMPACT

Globus Relief understands the needs of people, doctors, hospitals, and clinics in communities that suffer from a deficiency of medical equipment and supplies. To increase the effectiveness and absorbency of donated resources, we evaluate the needs of the recipient site, consult with charitable organizations working in the areas, as well as local government and healthcare providers, and then we send the most useful resources.

YOUR DONATIONS AT WORK

Our focus on quality and efficiency helps us maximize the end results of your donations through a strategic, streamlined process that saves time and minimizes wastefulness. This process includes:

- Evaluating the humanitarian and medical needs of our charitable partner project
- Finding the proper equipment and matching supplies for recipient hospitals and clinics
- Utilizing highly specialized medical engineering companies to service and recondition donated medical devices
- Assessing the recipients' abilities to maintain the equipment long term
- Providing technical support and training for recipients when needed
- Focusing on donating "green" or multiple-use supplies instead of single-use medical supplies which may negatively impact the environment

DISASTER RELIEF AND CATASTROPHIC EVENTS

In response to national or international disasters and catastrophic events, Globus Relief partners with other organizations to send essential medical supplies and equipment to the affected areas. We work closely with partnering agencies to rebuild the healthcare infrastructure long after these types of events occur. Your donations can ease the transition between tragedy and healing for devastated countries, families, and individuals.

HOSPITALS & CLINICS

In conjunction with Globus Relief's numerous partner charities, and through our assessment protocol, we are able to participate in the outfitting of numerous hospitals and clinics throughout the world. The equipment that is sent is always in excellent working condition and fits the needs of the particular location they are sent to. In addition, a large variety of reusable and disposable supplies are included to help with the day-to-day operations that take place. Our Project Managers work very closely with the end users to ascertain that equipment is properly placed and supplies are an appropriate accompaniment.

MISSION GROUPS

Community-minded individuals throughout the world participate regularly in humanitarian missions. They do this in an effort to make a difference. With the generosity of your donations, orthopaedic, dental, cleft lip & palate, ophthalmic, urological, and cardiac missions will continue to reach villages, inner-cities, countries and people who are so grateful for the generosity of your donations.

COMMUNITY DEVELOPMENT

Globus Relief participates with humanitarian partners locally and throughout the world in nutrition, hygiene, medical training, refugee & orphan care, homeless support services, animal welfare, health fairs, veteran's assistance, and substance abuse treatment programs. Individually it may not seem like much, but combined with the constant good work of individuals involved in each program, the impact is vast and very positive.
